

**LISTING OF CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-13. (Canceled)

14. (Currently amended) Method for adjusting an embedded portion of a television signal comprising:

receiving the television signal having the embedded portion, wherein the embedded portion comprises V-chip rating information;

detecting the embedded portion of the television signal; and

adjusting the embedded portion, where a downstream receiver is prevented from processing the adjusted embedded portion. The method of claim 13, wherein said adjusting step comprises:

determining whether to block the television signal based on the identified V-chip rating information; and

modifying the identified V-chip rating information to a universally unblocked rating if said determining is to pass the television signal.

15. (Currently amended) Method for adjusting an embedded portion of a television signal comprising:

receiving the television signal having the embedded portion, wherein the embedded portion comprises V-chip rating information;

detecting the embedded portion of the television signal; and

adjusting the embedded portion, where a downstream receiver is prevented from processing the adjusted embedded portion. The method of claim 13, wherein said adjusting step comprises:

determining whether to block the television signal based on the identified V-chip rating information; and

PATENT

Atty. Dkt. No. SAR 13788

modifying the identified V-chip rating information to a universally blocked rating if said determining is to block the television signal.

Claims 16-20. (Canceled)
